Godden's Central Argument: Deconstructing Faulkner's Prose

Godden's core argument in "An Economy of Complex Words" centers on the misconception that Faulkner's prose is simply overly convoluted and difficult. Instead, Godden argues that Faulkner's seemingly dense style is a deliberate and highly effective strategy, an "economy" of words meticulously chosen to convey specific emotional and psychological nuances, reflecting the complexities of his characters and narratives. He challenges the common perception of Faulkner as merely "difficult," highlighting the precision and purpose behind his lexical choices. Godden's analysis doesn't dismiss the challenges presented by Faulkner's writing but instead reframes them as intentional artistic choices.

The Precision of Faulknerian Diction

One key aspect of Godden's analysis focuses on Faulkner's vocabulary. Far from being random or excessive, Godden suggests that Faulkner's selection of words is highly specific. Each word carries weight, contributing to the overall texture and meaning of the passage. This deliberate choice of vocabulary isn't about showing off erudition, but about creating a unique atmosphere and conveying subtle shifts in character emotion and perspective. Faulkner's masterful use of **William Faulkner's vocabulary** results in a richness and depth rarely matched in 20th-century literature.

Sentence Structure and Narrative Complexity

Beyond vocabulary, Godden also examines Faulkner's famously complex sentence structure. His sentences often stretch across multiple lines, incorporating multiple clauses and digressions. However, Godden shows that these lengthy, intricate constructions are not mere stylistic flourishes. They serve a crucial narrative function, mirroring the stream-of-consciousness of his characters, and reflecting the tangled, often fragmented nature of their lives and experiences. The **complex sentence structure in literature**, particularly as employed by Faulkner, often becomes a powerful tool for conveying the inner world of his characters more effectively than simpler, declarative sentences.
