Open science

Fourth International Conference on e Science. pp. 182–189. doi:10.1109/eScience.2008.86. ISBN 978-1424433803. S2CID 11104419. Priem, J. (2011). "Uncovering

Open science is the movement to make scientific research (including publications, data, physical samples, and software) and its dissemination accessible to all levels of society, amateur or professional. Open science is transparent and accessible knowledge that is shared and developed through collaborative networks. It encompasses practices such as publishing open research, campaigning for open access, encouraging scientists to practice open-notebook science (such as openly sharing data and code), broader dissemination and public engagement in science and generally making it easier to publish, access and communicate scientific knowledge.

Usage of the term varies substantially across disciplines, with a notable prevalence in the STEM disciplines. Open research is often used quasi-synonymously...
