

Detailing For Landscape Architects Aesthetics Function Constructibility

Reglet

Thomas, Edward Allen, and Patrick Rand. Detailing for landscape architects: aesthetics, function, constructibility. Hoboken, N.J.: Wiley, 2011. 37. Print

A reglet is found on the exterior of a building along a masonry wall, chimney or parapet that meets the roof. It is a groove cut within a mortar joint that receives counter-flashing meant to cover surface flashing used to deflect water infiltration. Reglet can also refer to the counter-flashing itself when it is applied on the surface, known as "face reglet" or "reglet-flashing".

Deck railing

Rand, Patrick J. (2011). "Safe Glazing". Detailing for Landscape Architects: Aesthetics, Function, Constructibility. John Wiley & Sons. p. 122. ISBN 9780470904626

Deck railing is a guard rail to prevent people falling from decks, stairs and balconies of buildings. Over time, many different styles of deck railing have been developed.

Landscape architecture

Federation of Landscape Architects) as well as IFLA Europe. As a landscape architect, anyone can become a member of Architects Sweden if they have a national

Landscape architecture is the design of outdoor areas, landmarks, and structures to achieve environmental, social-behavioural, or aesthetic outcomes. It involves the systematic design and general engineering of various structures for construction and human use, investigation of existing social, ecological, and soil conditions and processes in the landscape, and the design of other interventions that will produce desired outcomes.

The scope of the profession is broad and can be subdivided into several sub-categories including professional or licensed landscape architects who are regulated by governmental agencies and possess the expertise to design a wide range of structures and landforms for human use; landscape design which is not a licensed profession; site planning; stormwater management...

Architecture

Renaissance favored Classical forms implemented by architects known by name. Later, the roles of architects and engineers became separated. Modern architecture

Architecture is the art and technique of designing and building, as distinguished from the skills associated with construction. It is both the process and the product of sketching, conceiving, planning, designing, and constructing buildings or other structures. The term comes from Latin architectura; from Ancient Greek ἀρχιτέκτων (arkhitéktōn) 'architect'; from ἀρχι- (arkhi-) 'chief' and τέκτων (téktōn) 'creator'. Architectural works, in the material form of buildings, are often perceived as cultural symbols and as works of art. Historical civilizations are often identified with their surviving architectural achievements.

The practice, which began in the prehistoric era, has been used as a way of expressing culture by civilizations on all seven continents. For this reason, architecture...

Interior architecture

of structural interiors for living, recreational, and business purposes and to function as professional interior architects. Study includes instruction

Interior architecture is the design of a building or shelter from inside out, or the design of a new interior for a type of home that can be fixed. It can refer to the initial design and plan used for a building's interior, to that interior's later redesign made to accommodate a changed purpose, or to the significant revision of an original design for the adaptive reuse of the shell of the building concerned. The latter is often part of sustainable architecture practices, whereby resources are conserved by "recycling" a structure through adaptive redesign.

Generally referred to as the spatial art of environmental design, interior architecture also refers to the process by which the interiors of buildings are designed to address all aspects of the human use of their structural spaces. Put simply...

Babworth House

major North American text on landscape gardening by Andrew Jackson Downing. At first sight conservative in their aesthetics, the lectures drew rhetorically

Babworth House is a heritage-listed former residence and school and now staff accommodation at 103 Darling Point Road, Darling Point, Sydney, Australia. It was designed in various stages by Mortimer Lewis, Edmund Blacket, and Morrow and De Putron and built from 1912 to 1915 by Messrs W. Gawne and Son. It is also known as Mount Adelaide. The property is privately owned. It was added to the New South Wales State Heritage Register on 13 August 1999.

Architecture in the United States

Italian Renaissance gardens by early landscape architect Beatrix Farrand and architectural design by several architects including Philip Johnson. The Harold

The architecture of the United States demonstrates a broad variety of architectural styles and built forms over the country's history of over two centuries of independence and former Spanish, French, Dutch and British rule.

Architecture in the United States has been shaped by many internal and external factors and regional distinctions. As a whole it represents a rich eclectic and innovative tradition.

Architecture of the Philippines

architectural aesthetics. Many scholars have championed for Japan and America's accountability for the destruction of many Filipino architectural landscapes and

The architecture of the Philippines reflects the historical and cultural traditions in the country. Most prominent historic structures in the archipelago are influenced by Austronesian, Spanish, Chinese, and American architectures.

During three hundred thirty years of Spanish colonization, the Philippine architecture was dominated by the Spanish influences. The Augustinian friars, along with other religious orders, built many grand churches and cathedrals all over the Philippine Islands. During this period the traditional Filipino Bahay na bató (Filipino for "house of stone") style for the large houses emerged. These were large houses built of stone and wood combining Filipino, Spanish and Chinese style elements.

After the Philippines was ceded to the United States as a consequence of the Spanish...

Van Ginkel Footbridge

St. John's, Newfoundland and Labrador. Architects Sandy Van Ginkel and Blanche Lemco van Ginkel, recognized for combining urban planning with architectural

The Van Ginkel Footbridge is a heritage-designated cantilever pedestrian bridge, located in Bowring Park, St. John's, Newfoundland and Labrador. Architects Sandy Van Ginkel and Blanche Lemco van Ginkel, recognized for combining urban planning with architectural skills, were commissioned in 1958 to design the footbridge.

Modern architecture

architecture. For each function its material; for each material its form and its ornament." This book influenced a generation of architects, including Louis

Modern architecture, also called modernist architecture, or the modern movement, is an architectural movement and style that was prominent in the 20th century, between the earlier Art Deco and later postmodern movements. Modern architecture was based upon new and innovative technologies of construction (particularly the use of glass, steel, and concrete); the principle of functionalism (i.e. that form should follow function); an embrace of minimalism; and a rejection of ornament.

According to Le Corbusier, the roots of the movement were to be found in the works of Eugène Viollet-le-Duc, while Mies van der Rohe was heavily inspired by Karl Friedrich Schinkel. The movement emerged in the first half of the 20th century and became dominant after World War II until the 1980s, when it was gradually...
