Timeline of computing 2020–present

medical questions with a 67.6% accuracy on MedQA and nearly matched human clinician performance when answering open-ended medical questions, Med-PaLM

This article presents a detailed timeline of events in the history of computing from 2020 to the present. For narratives explaining the overall developments, see the history of computing.

Significant events in computing include events relating directly or indirectly to software, hardware and wetware.

Excluded (except in instances of significant functional overlap) are:

events in general robotics

events about uses of computational tools in biotechnology and similar fields (except for improvements to the underlying computational tools) as well as events in media-psychology except when those are directly linked to computational tools

Currently excluded are:

events in computer insecurity/hacking incidents/breaches/Internet conflicts/malware if they are not also about milestones towards computer...

The result was keep. As several commentators have noted, the article probably should be retitled, but the appropriate forum for that discussion is the article's talk page, so they didn't even attempt to form consensus here as to what new title would be better.
