Grade inflation

compare students who took their exams at different times. Prospective employers must rely on indicators other than grades, such as internships and work

Grade inflation (also known as grading leniency) is the general awarding of higher grades for the same quality of work over time, which devalues grades. However, higher average grades in themselves do not prove grade inflation. For this to be grade inflation, it is necessary to demonstrate that the quality of work does not deserve the high grade.

Grade inflation is frequently discussed in relation to education in the United States, and to GCSEs and A levels in England and Wales. It is also an issue in many other nations, such as Canada, Australia, New Zealand, France, Germany, South Korea, Japan, China and India.

Often, the format and difficulty of the test is dependent upon the educational philosophy of the instructor, subject matter, class size, policy of the educational institution, and requirements of accreditation or governing bodies.

A test may be administered formally or informally. An example of an informal...

Eleven-plus

Eleven-Plus exam: short- and long-term consequences of the 1944 secondary education reforms in England and Wales; Stirling Economics Discussion Paper 2012-10

The eleven-plus (11+) is a standardised examination administered to some students in England and Northern Ireland in their last year of primary education, which governs admission to grammar schools and other secondary schools which use academic selection. The name derives from the age group for secondary entry: 11–12 years.

The eleven-plus was once used throughout the UK, but is now only used in counties and boroughs in England that offer selective schools instead of comprehensive schools. Also known as the transfer test, it is especially associated with the Tripartite System which was in use from 1944 until it was phased out across most of the UK by 1976.

The examination tests a student's ability to solve problems using a test of verbal reasoning and non-verbal reasoning, and most tests now...

In higher education, a comprehensive examination (or comprehensive exam or exams), often abbreviated as "comps", is a specific type of examination that must be completed by graduate students in some disciplines and courses of study, and also by undergraduate students in some institutions and departments. Unlike final examinations, comprehensive examinations are not linked to any particular course, but rather test knowledge across one or more general fields of study.

Graduate-level comprehensive examinations are sometimes also known as preliminary examinations ("prelims"), general examinations ("generals"), qualifying examinations ("quals"), or as major field examinations. If these examinations are held orally, they may be known colloquially as "orals". The comps most commonly come after the...
